

# JKS is on its Fast Track of Cloud and Connectivity

*JKS Just Great Logistics Ltd. is an end-to-end logistics service provider that has been connecting China to the international marketplace for over 20 years. The company is running and managing 16 warehouse facilities & offices in China, South East Asia, and the U.S. with over USD 1 billion worth of cargos & freight, serving international customers in North America, Europe, intra-Asia, and China; especially for those with a business interest in China and USA.*

## CHALLENGES

- Stable cross-border connectivity to link all of our offices at multiple locations with guaranteed data security

## SOLUTIONS

- Hybrid Cloud Management with EVPL Connectivity

## BENEFITS

- More stable and reliable connectivity in Asia Pacific
- Data security and faster response times through dedicated routes
- More than 30% reduction in IT costs

*“Serving international customers, especially in the Asia Pacific region, we put great effort in guaranteeing data security and stable cross-border connectivity, which over time increased our financial burden.”*

**Terry Xu, JKS Logistics**

JKS specializes in end-to-end logistics services connecting China to the international marketplace. The company was struggling with various challenges ranging from data loss and network outage between Hong Kong, China and other Asian countries. These issues resulted in a swell of its IT costs, including heavy expenditure on IT resources and supporting manpower.

*“OneAsia helped us address this issue with their Hybrid Cloud Management and EVPL Solution.”*

OneAsia was selected as JKS’s service provider eventually and the Hybrid Cloud Management with Ethernet Virtual Private Line (EVPL) Solution was deployed. OneAsia’s connectivity solution improves JKS’s application performance across a private, point-to-multipoint network design between multiple locations, even to a third party data center or cloud platform. OneAsia’s seamless hybrid cloud system with its multiple data centers established in various

sites crossing APAC further harmonically orchestrates JKS applications with cloud platforms. The solution gives businesses greater flexibility and more data deployment options. Moreover, it guarantees data security and faster response times through dedicated routes, as well as the high performance of client's critical business applications.

*“Most impressively, our IT cost has been cut by over 30% thanks to the newly adopted solution. Furthermore, OneAsia provided us with after-sales services including tier 1 and 2 technical support with a regular service level report evidencing the thoughtfulness and high quality of their services.”*

With support of OneAsia, JKS improves its business efficiency and can deploy its
