- Overhaul the network design including cross border connectivity
- On-demand Cloud services including planning, design, implementation, migration and operation

R-pac is an international branding and packaging service provider with over a thousand staff working in different countries across the globe. The company's I.T. infrastructure is located in its Hong Kong regional headquarter. Due to the redevelopment of old industrial buildings, r-pac Hong Kong regional head office is moving to a new location. OneAsia, serving as their managed service provider, provides a holistic turnkey solution for r-pac's relocation, including upgrading its whole system with data centre deployment at the new office to host the internal system. With the cross border IEPL services provided by OneAsia, it ensures cross border business operation between Hong Kong and China remains seamless, which offers reliable connectivity with higher availability.

Equipped with OneAsia's iMon 365 24x7 monitoring system, and leveraging on its strong data centre hub and network coverage in Asia-Pacific, the company's stability and business operation efficiency are guaranteed with an increase of 50%. In addition, the agility of cloud service enables the continual growth of the company and cost saving.
