

OneAsia Unveils State-of-the-Art Flagship Datacenter in Shanghai

2016 is gearing up to be a fruitful year for OneAsia. We continued to expand our operations in key trade areas, with 1 additional location in Hong Kong, and 2 in China.

- **Current coverage in Hong Kong:** Tsuen Wan, Chai Wan, and Tseung Kwan O datacenters
- **New in China:** 2 new datacenters in Shenzhen and Shanghai WaiGaoQiao

OneAsia recently launched its brand new flagship datacenter in Shanghai. The 6-storey datacenter, with a total capacity of 3,360 cabinets in phase 1, and an additional 3,000+ cabinets in phase 2, is situated in the WaiGaoQiao (WGQ) Free Trade Zone of Shanghai, where customers can benefit from the **tax-free policy**. The flagship datacenter commences operation in July 2016.

OneAsia WGQ datacenter **features:**

- Tier 3+ standard, upgradable to Tier 4
- Located in WGQ Free Trade Zone of Shanghai, wherein customers can enjoy Preferential Policies
- Located near Shanghai Stock Exchange; convenient access by Metro Line 6
- Networks: Software-defined networking (SDN) enable

- Feasible to carry out Modular Data Centre Solution
- Total Size: 26,000m²
- Capacity per rack: 3.5kVA up to 8 kVA
- Crac redundancy: N+2

Network Outreach

OneAsia is both a licensed Fixed Network as well as a datacenter provider in China, where all of the datacenters are inter-connected with our diversified fiber ring. In addition, our fiber network outreach surpasses 90% of other carrier neutral datacenters within China, Hong Kong and Taiwan, therefore servicing within our footprint will only take days instead of weeks.

It is also interconnected with all of our Data Centers in Hong Kong, Shanghai, Jiangsu, Shenzhen, Beijing, as well as our new data center in Tseung Kwan O (Hong Kong), with resilient fiber ring.
