

FOR IMMEDIATE RELEASE

OneAsia becomes Supplier in Government Public Cloud Services (GPCS)

[Hong Kong, August 9, 2018] OneAsia, one of the leading IT services and solution providers in Asia, announced today its enlistment as a Government Public Cloud Services (GPCS) supplier, through which the HKSAR Government Bureaux and Departments (B/Ds) can acquire public cloud services. Having passed the strict criteria, the appointment confirms our cloud services are of a high standard among the industry. Looking ahead, we pledge to maintain excellence in our performance.

B/Ds can process data with different security requirements under GPCS and acquire different security features like data encryption in transit and data encryption at rest, two-factor authentication and multi-factor authentication and local data storage so as to meet their specific security requirements.

About OneAsia

OneAsia is a leading IT service and solution provider in Asia providing the cloud-based solution as well as data center services, with a full range of cloud computing solutions, from infrastructure, management to application software for the business of all sizes.
