For Immediate Release

OneAsia Debuts Appcara App360 Appliance PLUS, Giving Enterprises Turnkey Multi-Cloud, Data Protection And Server Migration

Appliance Offers Enterprises Easy, Secure Transfer of Mission-Critical Apps And Servers into Public and/or Private Clouds; Ready-to-Use MS Office 365 Included

Hong Kong, July 21, 2015 –OneAsia, an Asian leading IT, data center and cloud solution provider, today announced the offer of making Appcara's App360 Appliance PLUS available to customers. The appliance, a comprehensive solution for enabling enterprise a reliable and future-proof migration of their apps and servers to public and/or private clouds, with built-in data protection, is released by Appcara, a provider of multi-cloud and application automation solutions.

App360 Appliance PLUS is a half-width 1U server integrated with OpenStack™ cloud orchestrator plus firewall, load-balancer and ready-to-use Microsoft Office 365. App360 Appliance PLUS is based on App360, allowing enterprise to deploy and manage applications in public and private clouds.

"Enterprises have been looking for turnkey solutions to accelerate their cloud transition. Appcara's App360 Appliance PLUS is packed with a comprehensive set of capabilities such as multi-cloud, data protection, server migration and Microsoft Office 365," noted Charles Lee, Founder & CEO of OneAsia. "It's plug-n-play with built-in security for our customers to securely transmit VM backup and replication to our data centers for data protection. This all-in-one solution enables us to offer services to our customers' on-premise environments."

App360 Appliance PLUS, featuring single pane of glass operation, also allows users to share workload among clouds and to extend service capabilities for integration with frontend/backend systems and networks.

"Today, enterprises are required to use different tools to migrate their legacy servers to a cloud and manage day-to-day operations which is time-consuming and expensive, requiring specialized skills and often resulting in low success rate," said John Yung, Founder & CEO of Appcara. "App360 Appliance PLUS is specifically designed to simplify the cloud transition process and operations, allowing enterprises to migrate bare-metal and virtual servers to different cloud platforms in just three simple steps.

In addition to the Microsoft Office 365, App360 Appliance PLUS offers a free repository of pre-packaged apps in the most popular business categories. Appcara's App360 Marketplace spans open source and commercial applications in Big Data, Business Intelligence, CMS, CRM, collaboration, databases, development platforms, ERP, life science and many more.

- **Over 60 titles** including Cloudera, PostgreSQL, SQL Server, MongoDB, MySQL, Oracle DB and Redis
- **Complete flexibility** in app deployment; launch on standalone basis or mixed as components into more complex workloads
