

Providing Private Cloud Solution for Vertex

CHALLENGES

- Handling large amount of data that needs to be shared internally is one of the challenges that Vertex is facing, which it causes frequent server downtime. On the other hand, the company is also highly dependent on particular hardware model for critical applications.

SOLUTIONS

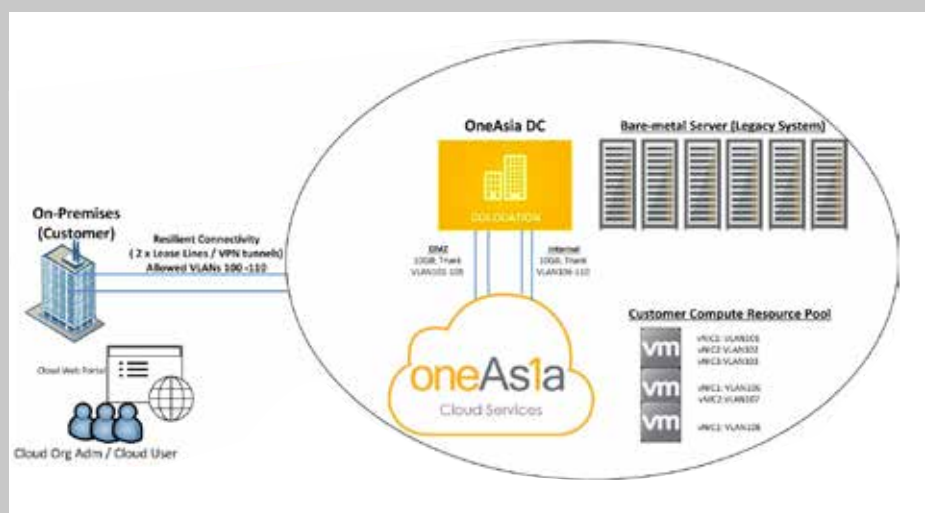

- Private cloud solution, virtualisation technology, on-site local storage and remote cloud storage

BENEFITS

- Allows numerous servers to consolidate to a fewer physical machines
- No longer require dependency on particular hardware model
- Full control over the data accessibility
- Uptime of the servers has significantly increased, thus improving the business efficiency
- Well planned system design and user-friendly interface

Being a global high quality flooring manufacturer in US with offices located internationally, Vertex requires high stability and high degree of security service to ensure the accuracy of data transmission and to maintain its business continuity. Vertex was searching for a cost effective and reliable private cloud solution to replace its existing IT system in handling massive trading data and clients' information.

OneAsia's customised private cloud solution provides high degree of security and reliability service to Vertex. Leveraging on OneAsia's virtualisation technology allows the company to manage their IT resources dynamically and users can access to data anytime, anywhere. The state-of-the-art cloud solution has enhanced the efficiency and accuracy of data transmission, thus reducing the time and hassle in sharing data internally. More importantly, the standardisation and automation of private cloud have reduced the IT operational costs significantly.

If we can be of help in any way, or if you have business ideas and expectation, please contact us: <http://www.oneas1a.com/enquiry.html>
