

## OneAsia Network Limited

# Net Zero Policy

As a leading datacenter service provider headquartered in Hong Kong, we are committed to achieving net zero greenhouse gas emissions across our operations and value chain by 2050. This commitment aligns with Hong Kong's Climate Action Plan 2050 and the global effort to limit global warming to 1.5°C above pre-industrial levels.

### Targets

- Net Zero by 2050
- PUE reduction by 6% by 2030 (against 2025 baseline)
- WUE reduction by 6% by 2030 (against 2025 baseline)

### Strategies

- Energy Efficiency
  - Continuously invest in energy-efficient cooling systems, servers and IT equipment.
  - Implement AI and machine learning to optimize datacenter operations.
  - Design new datacenters to meet green building standards.
- Renewable Energy Procurement
  - Procure renewable energy through a combination of renewable energy certificates, power purchase agreements and renewable energy feed-in tariff scheme as applicable.
  - Explore workability of installing on-site solar PV in datacenters.
- Stakeholder Engagement
  - Collaborate with suppliers to reduce carbon footprint in procured products and services.
  - Assist customers in measuring and reducing emissions from use of our services.

We will work towards reducing our Scope 1 and Scope 2 emissions towards 2050. Our interim 50% reduction of greenhouse gas intensity is targeted by 2038. We will transparently report our progress through our ESG performance reports. Achieving net zero is crucial for mitigating climate risks and positioning our company for success in the transition to a low-carbon economy.
