OneAsia's AIOps platform OAsis wins top honours across APAC, including HKICT Smart Business Award

Singapore, December 6, 2024 -- OneAsia, a leading data centre AI enabler for supercomputing infrastructure and operation in Asia, is thrilled to announce a significant milestone for its AI Ops platform, OAsis Supercomputing. The platform has recently garnered three prestigious awards, including the Hong Kong ICT Awards – Hong Kong's most recognised and longest-standing information technology recognition program. These awards include

- **Hong Kong ICT Awards** – Smart Business (Emerging Technologies) Award
- **Communications Association of Hong Kong (CAHK) STAR Award** – Best AI Application (Merit)
- **W.Media Cloud and Datacenter Awards (APAC)** – Projects: Digital Technology in Data Centers

These accolades reinforce OneAsia's reputation as a leader in AI innovation, demonstrating how OAsis can simplify and enhance AI development for businesses.

OAsis is an enterprise-grade portal for AI and high-performance computing workloads. It supports mainstream AI frameworks and High-Performance Computing (HPC) methodologies, offering convenient features like Marketplace with solutions from different vendors such as IBM and HPE. The platform serves diverse sectors including financial services, government agencies, aviation, higher education institutions, and professional services firms.

As your trusted AI Factory Enabler, we offer streamlined LLM training, lower AI deployment barriers, and reduced GPU expenses. Our services include flexible GPU-as-a-Service across cloud environments with top-notch data security, on-premises infrastructure for sensitive data, and dedicated local AI experts to support your entire AI journey.

"We are incredibly proud to see OAsis recognized with these esteemed awards," said Mr. Charles Lee, CEO of OneAsia Network. "These honours affirm our dedication to creating advanced solutions that help businesses harness the full potential of AI. OAsis provides a centralized platform for GenAI and GPU management, enabling seamless deployment with just a few clicks."

As OneAsia Network looks to the future, the company is committed to further enhancing OAsis and expanding its capabilities. The focus will remain on delivering user-friendly solutions that empower organizations to leverage AI effectively, ensuring they stay ahead in a rapidly evolving technological landscape.

About OneAsia Network:
Established in 2009, OneAsia is a leading data centre AI enabler for supercomputing infrastructure and operation. We operate top-tier rated data centres across Asia, including the Greater China, Singapore, Thailand, Japan, and Korea. For more information, please visit www.oneas1a.com
